Introducti on

- Manual turf booking is time- consuming and inconvenient.
- Turf-Kick allows users to search and book turfs online.
- Provides real-time slot availability and equipment booking

PROJECT OVERVIEW

CURRENT CHALLENGES

- Sports infrastructure suffers from inefficient management with manual booking methods causing time conflicts and poor facility utilization.

PLATFORM SOLUTION

- Web-based system simplifying turf booking and sports accessory rental through online platform.

KEY FEATURES

- Real-time availability, instant reservations, equipment rental, secure authentication.

PROBLEM STATEMENT

Manual Booking

Bookings are done via phone calls or in person.

Double Booking Issues

Manual Record Keeping

No Real-Time Availability

Users cannot check turf availability before booking.

No Unified Platform

No single system to manages turfs and sports accessories together.

OBJECTIVES

- **Online Turf Booking Platform**

Develop a web platform to book sports turfs online.

- **Easy Turf Search**

Users can search turfs and view available time slots.

- **Secure User Login**

Provide authentication for safe account access.

- **Accessory Booking**

Allow booking of sports accessories with turf.

- **Prevent Double Bookings**

Use automated updates to manage availability.

Existing System Vs Proposed system

Features	Existing system (Manual)	Turf-kick
Booking method	Manual booking through phone calls or in person	Online booking through web platform
Availability Check	Users cannot check real-time turf availability	Real-time availability of turfs is displayed
Booking Conflicts	High chance of double booking	System prevents duplicate bookings
Booking Management	Managed manually using registers	Automated booking management system
Access to Accessories	No integrated option for sports accessories	Users can add accessories during booking
User Convenience	Time-consuming and less efficient	Fast, easy, and accessible from anywhere
Record Maintenance	Manual records prone to errors	Digital database for accurate records

Technology Stack

Frontend

- HTML
- CSS
- JavaScript

Backend

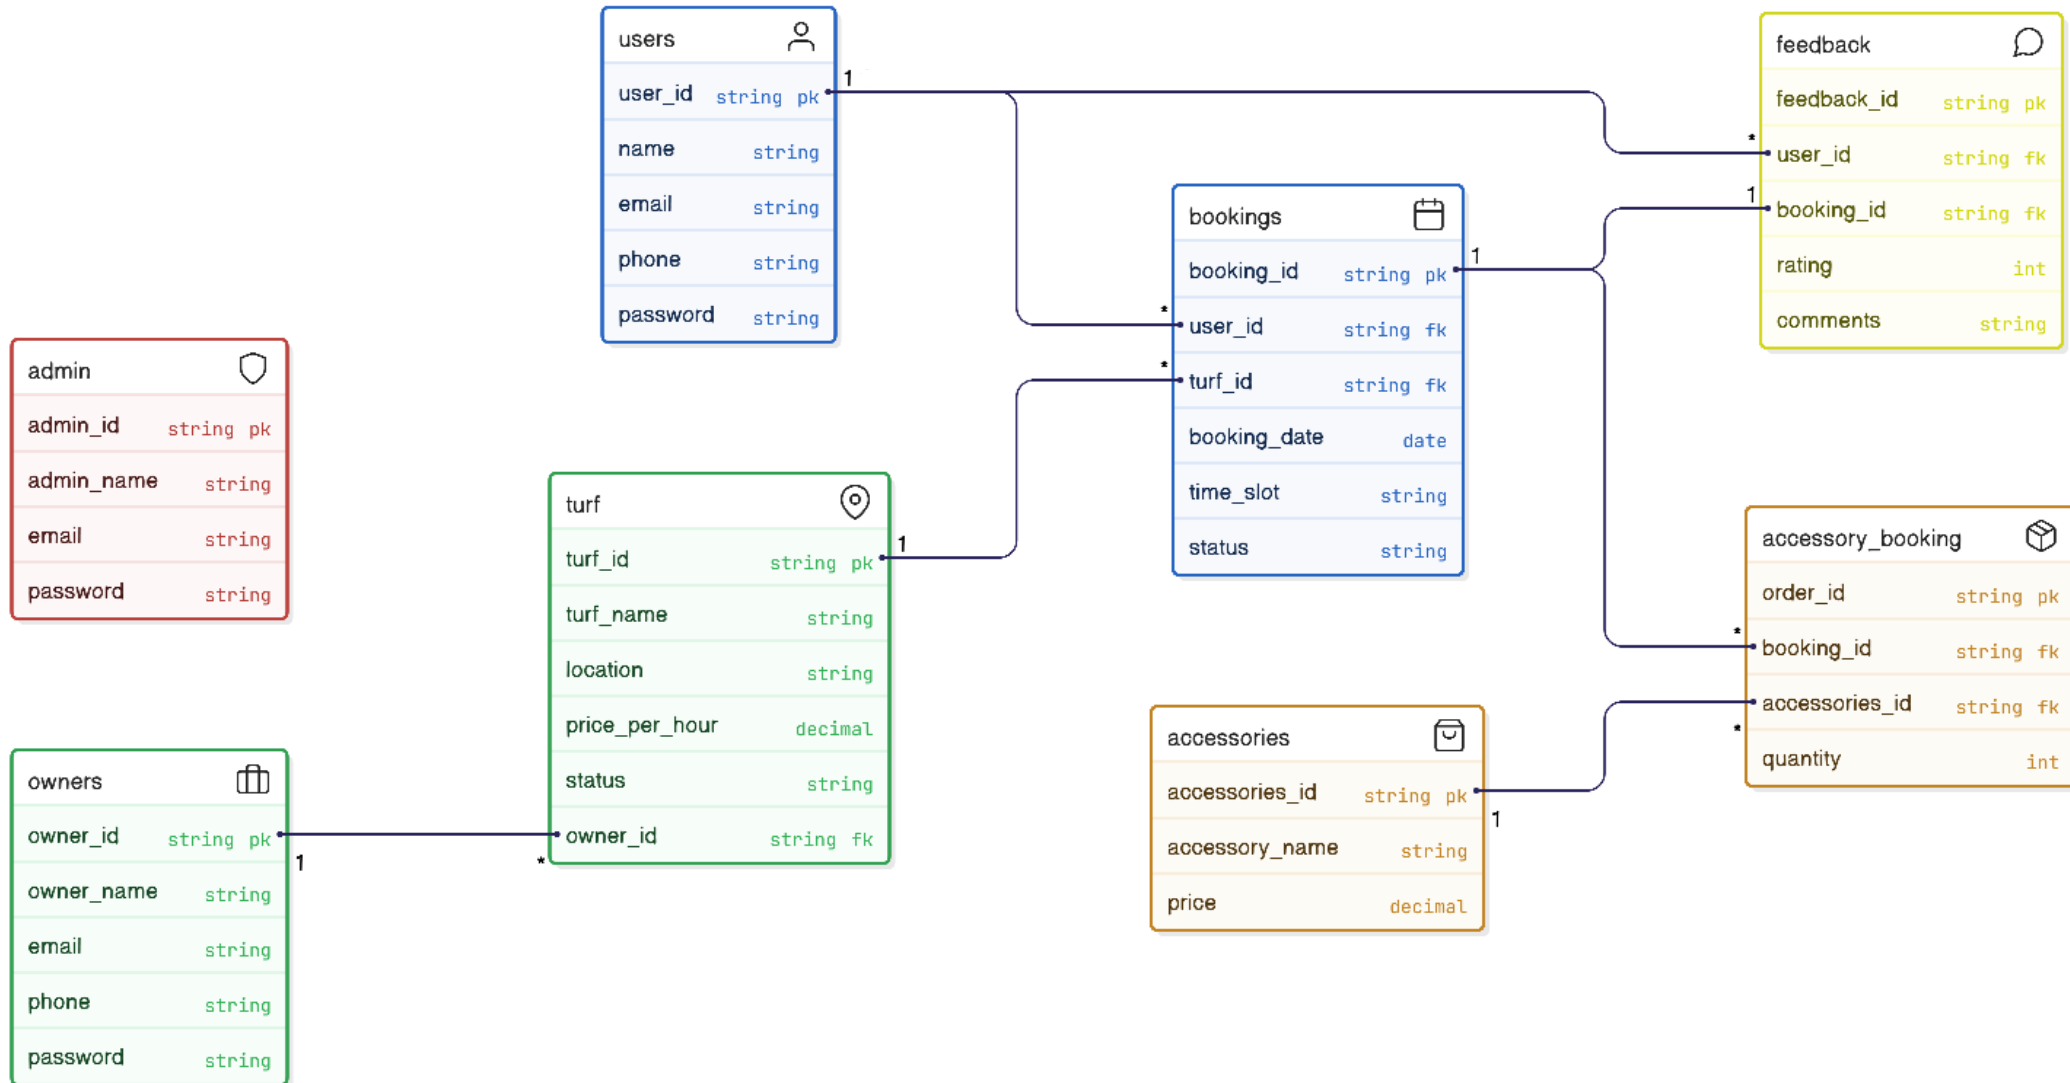

- PHP
- MySQL

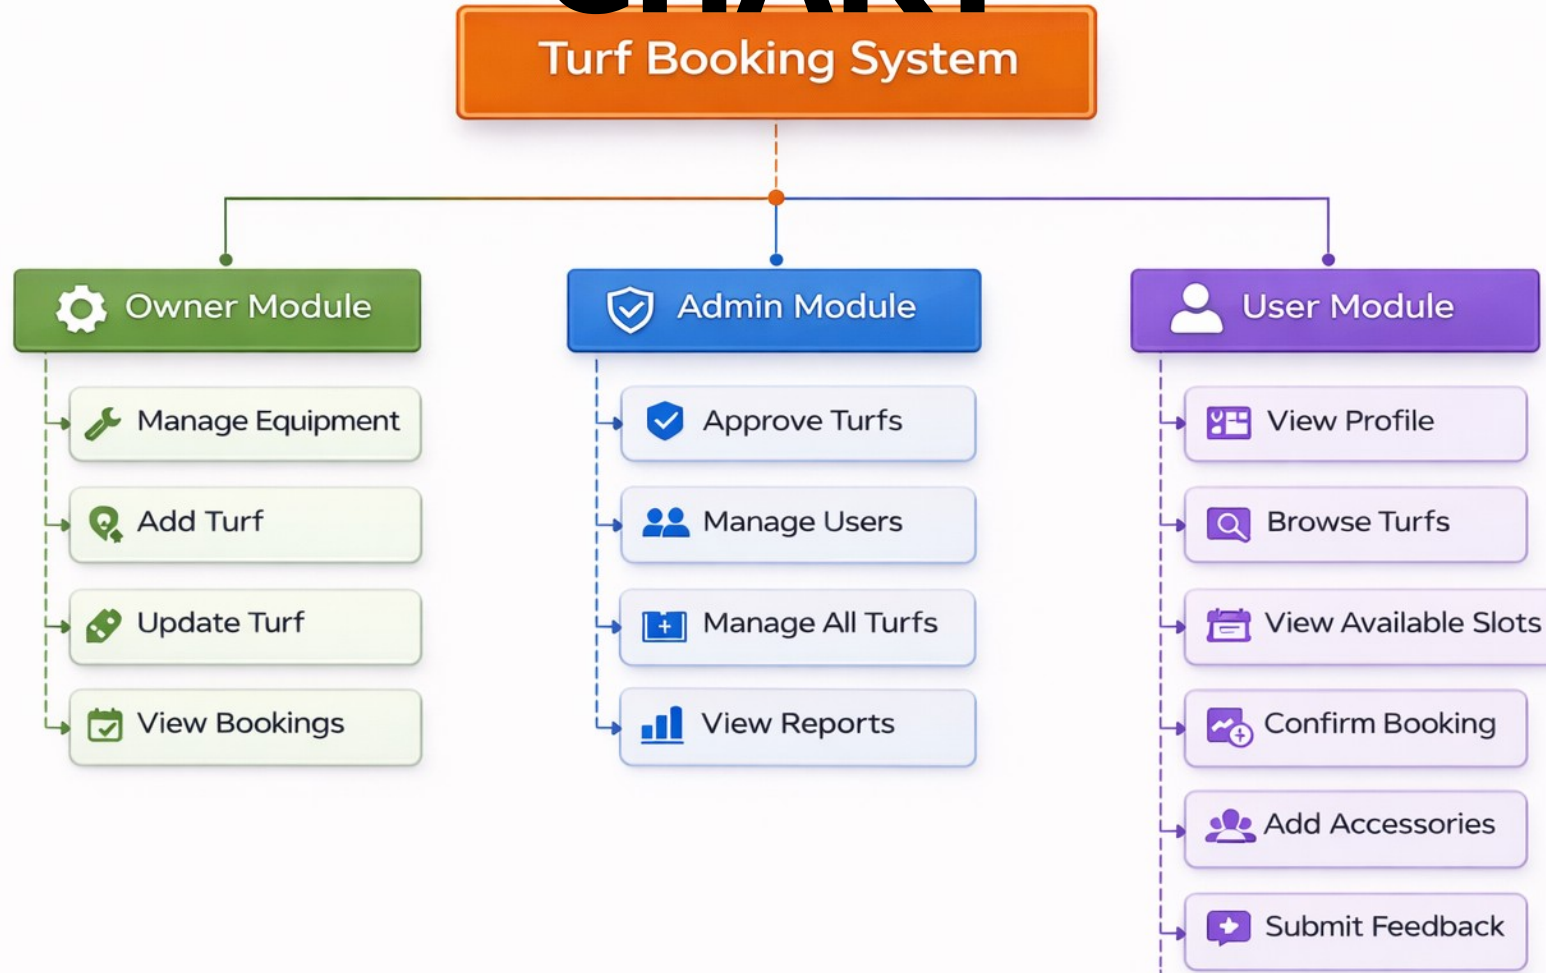

Tools Used

- Vs Code
- Git & GitHub
- Xampp

DATABASE DESIGN

STRUCTURE CHART

MODULES

User Module

- Allows users to create an account and log in securely.
- Users can browse available turfs and check time slots.
- Enables booking of turfs based on availability.
- Users can add sports accessories during booking.
- Allows users to view their profile and submit feedback.

Owner module

- Turf owners can log in to manage their turfs.
- Owners can add new turf details to the system.
- Allows updating turf information and availability.
- Owners can manage sports equipment and accessories.
- Provides access to view booking details made by users.

Admin module

- Admin manages and monitors the entire system.
- Approves turfs added by owners before listing.
- Admin can manage users and turf records.
- Allows viewing and monitoring all bookings.

Challenges Faced

Database Design Complexity

- Structuring tables and relationships for users, turfs, bookings, and accessories.

Preventing Double Bookings

- Ensuring the same turf and time slot cannot be reserved multiple times.

User Authentication Issues

- Implementing secure login and session management.

User Interface Design

- Designing a simple, responsive, and user-friendly layout.

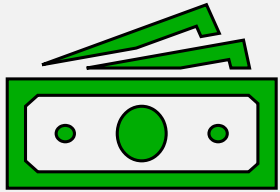

Real-Time Availability Updates

- Updating booking slots immediately after reservations.

Managing Turf Availability Data

- Organizing time slots and booking details efficiently.

Future Plan

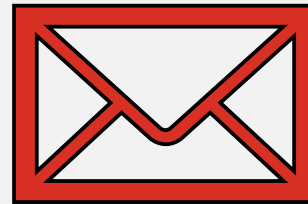

Integrate Online Payment System

Enable users to make secure payments during booking.

Develop Mobile-Friendly Interface

Improve responsiveness for better mobile user experience.

Add Notification System

Send booking confirmations and reminders via email or SMS.

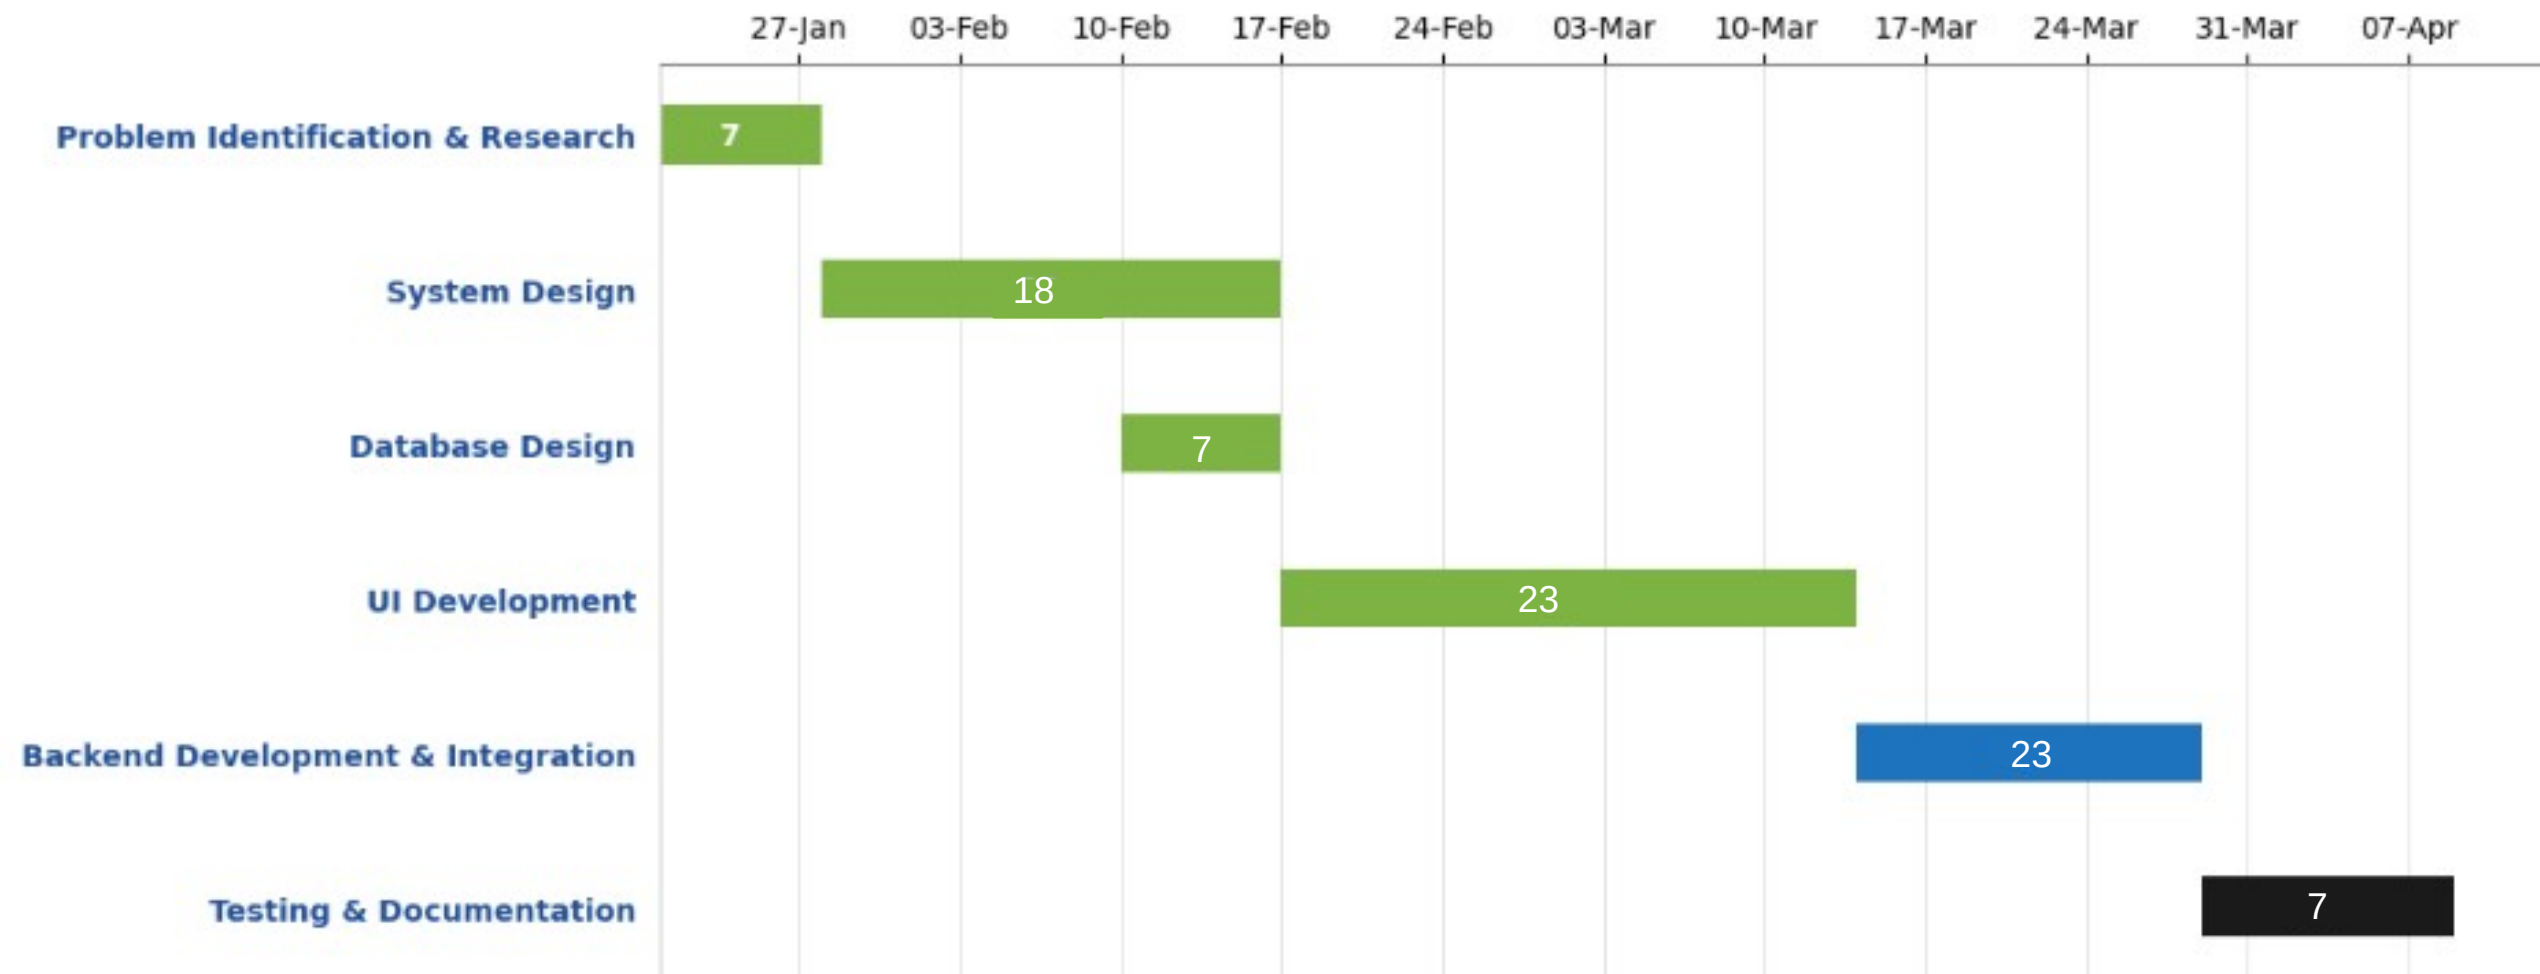

Improve Security Features

Implement stronger authentication and data protection methods.

CONCLUSION

“Turf-Kick simplifies turf booking with real-time access and efficient management, with future plans to expand into a complete smart sports platform.”

CONCLUSION

Simple Turf Booking Platform

Provides an easy web-based solution for turf reservations.

Real-Time Availability

Users can quickly check available turfs and time slots.

Efficient Booking Management

Reduces manual work and avoids scheduling conflicts.

Better User Experience

Improves convenience for both players and turf owners.

Future Scope

Can expand into a complete sports facility management system.

Thank You!

We appreciate your time and attention

— Team Turf-Kick
